I sent this is Knox in response to this question. I really don't know. I tried to get Robert to understand that dba is not pulling this information to the bound book. It has something to do with the location of the item maybe.. in R&D but I don't know for sure.

If it is in DBA, it should be in the bound book but there is a disconnect. I have sent emails to specific examples to Robert of numerous occasions asking him to research it and why but have never heard anything from him.

Knox,

I am honestly not sure. I have tried to tell them (Oak Point, Robert) that items in R&D that are in DBA are not showing up on the bound book. They have given me no resolution. Sorry I can't be of further help.

Allison

Hey Allison,

I have an SBR Lower from PWS that I had Mike Kojan enter into our system, but it's not showing up in the bound book. Ethan created a part number for it in DBA: 102151. What do I need to do to get it into the bound book?

Thanks,
